

have you Experienced...

a wedding where the experience was missing something... perhaps a grand entrance into a room of people standing by the bar - not focused on the new couple, where toasts or announcements could not be understood, where guests talked loudly - unaware of the first dance, where the music stopped abruptly without appropriate transition, where dj effect lights flickered with no coordination to the music or moment and where guests left early resulting on a poor return on investment...

can you Imagine...

a wedding where there was something extra... a flow of special events that seamlessly transitioned with ease and dynamic contrast, where guests were enthused and cheered for the couple's grand entrance, where the Artist DJ performed & dedicated a live music performance to the new couple during dinner, where dynamic uplighting changed to create emphasis on key moments throughout the evening, where the Artist DJ facilitated special surprises for the couple that captivated and moved every guest, where the first dance was an intimate and special moment with all guests attentive and engaged, where all guests danced the night away like never before...staying until the end...and beyond for an encore performance...

it starts with a Phone Call...

...to learn there is a different, totally unique approach to wedding entertainment. If you invest only about 10 minutes of your time, you might change your wedding day entertainment from a disc jockey or band to an experience....an Elysium Experience.

The Elysium Experience

e-ly-si-um | "state of perfection"

E-ly-si-um | A place or state of perfect happiness. Our commitment is to help you achieve that state on your wedding day. In order to create that environment for your ideal wedding celebration, it will require many elements. The perfect music, an engaging master of ceremonies, and pristine sound are only a part of what it takes for an unforgettable wedding experience.

We ask all of our couples for three words to describe their ideal wedding experience. The most common of those are "elegant, fun, exciting, entertaining, unique ...memorable." A memorable wedding experience is the most requested by our couples. What makes an experience memorable? Unforgettable memories are linked with emotional experiences. Emotional experiences happen not from typical or expected, but from the unexpected...the unique.

Our philosophy is: to be memorable, it must be unique. We find a balance of uniqueness and tradition that is tailored just for you. We specialize in working with our couples to create a unique wedding experience that is a place or state of perfect happiness - an Elysium Wedding.

Unforgettable events don't happen...they are created
